

Following the given assignment, I used the Brizy Web Development Cloud Application to create my website. I used the unicorn template that was amongst the given templates and I customized it to suit the software solutions that are offered by Pretumber Pvt Ltd.

For the Navigation Bar, I managed to create jump links for the Feature, Gallery and Pricing Buttons that automatically direct you to the relevant section thereof.

I also managed to remove the solid colour background that was there by selecting the colour option from solid to none. Thereafter I also managed to upload a picture which I managed to set as my background picture. I also managed to remove the preceding picture and put through a picture that was aligning with the use of the software solution provided by the company.

I also managed to customize the features, to add explanations to the Mineral Analysis, Segmented Minerals and Customized Reporting where brief explanations were highlighted in relation to the topical features above.
