

Waste2Feed: transforming food waste into opportunity

One-third of all food produced globally goes to waste. Waste2Feed is a sustainable solution that converts food waste into valuable resources, creating a greener future.

The Problem: food waste in restaurants

Unsold Food

Restaurants often discard perfectly good food that has not been sold.

Spoiled Food

Even food deemed "unfit" for sale may be safe for animal consumption.

Waste2Feed: a sustainable solution

Collection

We partner with local restaurants to collect unsold and spoiled food.

Processing

We transform food waste into animal feed, fertilizer, and other valuable products.

Distribution

We sell these products to local farms and agricultural businesses.

A Win-Win: Benefits for Everyone

Reduced Waste

We divert food waste from landfills, reducing greenhouse gas emissions.

Cost Savings

Farmers can purchase affordable feed and fertilizer, reducing their operating costs.

Sustainable Farming

We promote sustainable farming practices by providing high-quality organic fertilizer.

Strong Market Demand and Proof of Concept

1

Local farms are already purchasing food waste for animal feed.

2

Companies like ENERGEMAN are utilizing food waste for bio gas production.

3

Bread Lobe and Feed Additives have strong market demand due to cost-effectiveness.

Investment Opportunity: Join the Green Revolution

€50,000 - €175,000

Seed Funding

Needed to cover initial setup and operation for the first 6 months.

Join us in creating a sustainable future. Let's turn waste into valuable resources, together.
